

## CT10 Stainless Steel Case Taper

The CHS CT10 stainless steel case taper has been specially designed to survive the rigours of today's 24/7 food factories.

The main features are

- Stainless steel throughout so no rust or rot to worry about
- Top and bottom carton sealing at up to 30 products per minute
- Can use 36mm, 48mm, 50mm, and 60mm tape widths
- Wide case size variation from 100mm x 100mm up to 500mm wide by 580mm high
- Simple handle adjustment for height and width with graduated scales for easy and repeatable setup
- Optional energy saving controller which turns the unit off after a preset time if no production is running. It automatically switches back on when production restarts
- Simple tape threading minimises tape change over time
- Castors as standard to allow the taper to be moved easily for cleaning.
- Optional semi-automatic top flap closer available
- Optional infeed and outfeed roller conveyor
- Optional carton holder on infeed – holds erected cartons in position for manual filling
