

X470 Power Pre-stretch Pallet Wrapper

- The Power Pre-stretch Pallet Wrapper is the newest addition to our range, saving you production time and more cost effective than hand wrapping.
- With its 2.4 metre mast (or 3 metre optional mast) and 1650mm diameter turntable this pallet wrapper allows you to not only wrap standard sized pallets but euro sized pallets as well.
- The simple loading of film rolls makes it impossible to miss out the pre-stretch film rollers which drive your savings.
- This pallet wrapper's soft start and stop make wrapping unstable pallets just as easy as the wrapping of stable ones.
- The control panel with its clear LED readout is password protected ensuring that no unauthorised editing can be done keeping your machine running smoothly throughout production time.
- This pallet wrapper's accompanying built in photocell height detector accommodates any random height pallets you may need to wrap.
- With its front and rear forklift entry loading and manoeuvring pallets is now easier than ever, included with this machine is a heavy duty ramp. This is easily attached with connectors and it retains its position without the need for any bolt securing.
- On the control panel you will find an emergency stop button and a twist button for simple control over the speed of pallet wrapping.
